

Sunrise Series

Vinyl Replacement Window

It's time to replace your windows - or is it?

How do you know when it's time to replace your windows?

If you answered 'yes' to any of these questions, it is time.

Are your windows letting in too much air during the winter and summer months?

Window design has improved significantly over the last 15 years. If your windows are leaking water or allowing the outside weather into your home, it is time to replace them. A new vinyl window with a LoE glass option will reduce heat loss or gain by up to 64%, which can reduce your utility costs*.

Do your windows leak water or gather condensation on the inside?

If your windows are still using single pane glass, you will benefit significantly from the increased energy efficiency of a double pane LoE glass window, which can reduce your utility bill. In addition, moisture from leaks and condensation can get on and inside your walls which is a leading cause of mold and mildew in homes.

Is it difficult or impossible to open, close or lock your windows?

When your windows become inoperable, it can become a serious fire or safety issue. That alone is reason enough to replace. Not to mention being unable enjoy a little fresh air on beautiful days.

Are your windows rotting, blistering or peeling?

Repairs and maintenance required by single pane, old aluminum windows can be costly. Legacy Vinyl Windows are made from materials that won't fade, flake, blister, chalk or peel. They never need to be painted and are designed to withstand the elements.

Do your windows look outdated or unattractive?

Your home may be your biggest investment. Replacing old mismatched windows can vastly improve the look and value of your home. Whether you are selling or want to improve the quality of your home, new windows can transform the look of your home more than any other improvement.

Are your furniture, carpet or window treatments fading from sun exposure?

Legacy Vinyl Windows feature LoE³-366 glass which blocks 95% of the sun's damaging ultraviolet rays (a leading cause of fading), so it will help your furniture, carpets, curtains and wall coverings stay beautiful for years to come.

What are the benefits of replacing your windows?

IMPROVED ENERGY EFFICIENCY

A Legacy Vinyl Window with LoE Glass reduces the amount heat entering your home from solar radiation by 64% compared to ordinary glass*. In addition, a Legacy LoE Energy Plus window with argon gas meets Energy Star®

Legacy LoE Energy Plus windows are designed with 2 panes of LoE³-366 high performance glass and enhanced with argon gas. LoE³-366 glass provides the highest levels of year-round comfort and energy savings, making it the perfect glass no matter where you live*. LoE³-366 glass with argon gas qualifies as an Energy Star® Certified Window, which saves energy and reduces utility costs by keeping the cool air inside in the summer and the warm air inside in the winter.

EASIER TO CLEAN AND OPERATE

Features such as a tilt-in removable sash or grille-between-the-glass make cleaning the exterior of your windows a breeze.

ELIMINATE DRAFTS AND LEAKS

Enjoy the comfort of your home and protect your interior, no matter what the weather brings. Legacy Vinyl Windows are designed to be weather-resistant and air-tight, keeping out drafts, wind and water.

SMART INVESTMENT

New windows can transform the look of your home more than any other improvement. This investment in your home will pay off if you are selling. In addition, new windows will increase energy efficiency, which means monthly savings on utility bills.

VIRTUALLY MAINTENANCE FREE

Our windows are made from materials that won't fade, flake, blister, chalk or peel. They never need to be painted and are durably built to withstand the elements.

4 easy steps to choose the right window.

1

Select Window Type

The Legacy Vinyl Replacement Window comes in virtually unlimited sizes and combinations. We offer four types of windows to fit your home's unique design.

CUSTOM SIZES AVAILABLE

SINGLE HUNG WINDOWS

Single hung windows have a top sash that is fixed in place and does not move, but the bottom sash moves up and down.

SLIDING WINDOWS

Sliding or gliding windows have one sash that is fixed in place and does not move, and one that slides open horizontally from one side, providing easy access to fresh air.

PICTURE WINDOWS

Picture windows are windows that do not open. Usually installed in difficult to reach places to let in light, they are ideal for unobstructed views where ventilation is not a concern.

ARCHITECTURAL SHAPES

These are also windows that do not open but come in various shapes such as an eyebrow, half circle, full circle and rectangle.

2

Choose Glass

Choose from LowE glass, LowE Energy Plus glass, tinted, obscure, rain or tempered safety glass.

LoE GLASS

This insulating glass package contains two panes of glass, triple-coated with LoE³-366, and Warm Edge Spacer technology.

It reduces the amount heat entering your home from solar radiation by 64% compared to clear insulating glass, providing the highest levels of year-round energy savings and comfort*.

LoE ENERGY PLUS

This insulating glass package contains two panes of glass, triple-coated with LoE³-366, and Warm Edge Spacer technology.

It also has argon filled chambers qualifying it as an Energy Star® Certified Product.

*Cardinal Glass, manufacturer of LoE³-366.
